## Story

People in the whole world have been fascinated with God Particle since its first appearance in 2012. Scientist Hawking, by linking his brain with the most powerful computer in the world, made a great contribution to theoretical physics, proving that the God Particle captured can be dated back to 13 billion years. Time Gate was held open for human beings!

Hawking predicted that dark energy existed in the form of crystal at the infancy of the universe and named it "Dark Energy Crystal", which has become the most powerful energy source in universe since expeditionary force first carried it from ancient relic to earth. The ancient people in Terra left extraordinary technological remains, and thereafter the First Space Settler Age began.

## Gameplay
